

School Report Cards

Exceeds state standards in academic achievement

Achievement

The Achievement Component measures students' academic achievement using each level of performance on Ohio's State Tests.

Please see the **Achievement Component Technical Document** (<https://education.ohio.gov/getattachment/Topics/Data/Report-Card-Resources/Traditional-Report-Cards/Traditional-Achievement-Component-Technical-Document.pdf.aspx?lang=en-US>) for additional details on the calculation.

Performance Index

The Performance Index measures the test results of every student, not just those who score proficient or higher. Schools and districts receive points on the index for every student who takes a test. The higher the performance level on the state tests, the more points awarded toward the index score. The index score is divided by the maximum possible score. Each year the maximum possible score is determined by the average of the highest 2% performance index scores in the state.

$$\frac{90.2 \text{ Performance Index Score}}{109.8 \text{ Maximum District Performance Index Score}}$$

Performance Indicators (Report Only)

The Performance Indicators are reported for informational purposes only and do not contribute to the Achievement Component Rating. They report the percent of students who have scored proficient or higher on each state test. Previously, indicators have displayed proficiency among all students taking a grade and subject test. This year, indicators can also be viewed for just students taking a grade and subject test that are enrolled in a specific grade.

	Tests Proficient	Tests Taken	Percent Proficient
Third Grade			

82.2%

Performance Index Percent

Performance Index trend data shows the points received for each performance level over time.

Proficiency trends show the percentage of tested students in each performance level over time.

English Language Arts	230	327	70.3%
